Tampilan Register

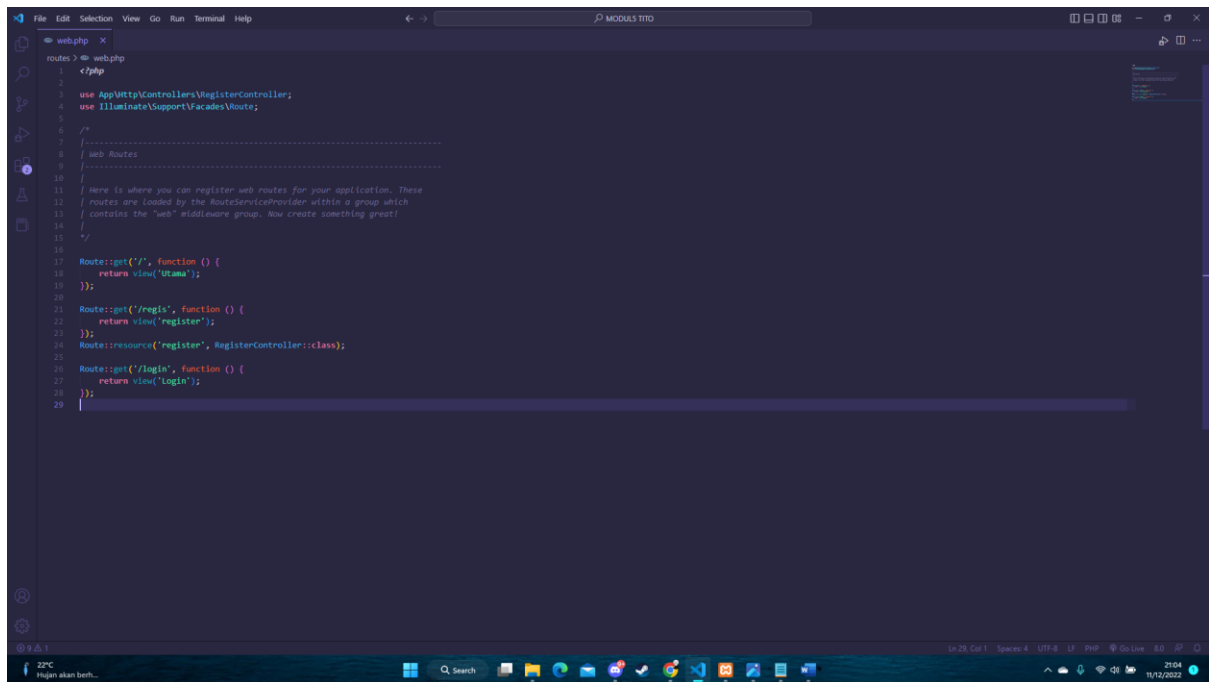

### Tampilan Login

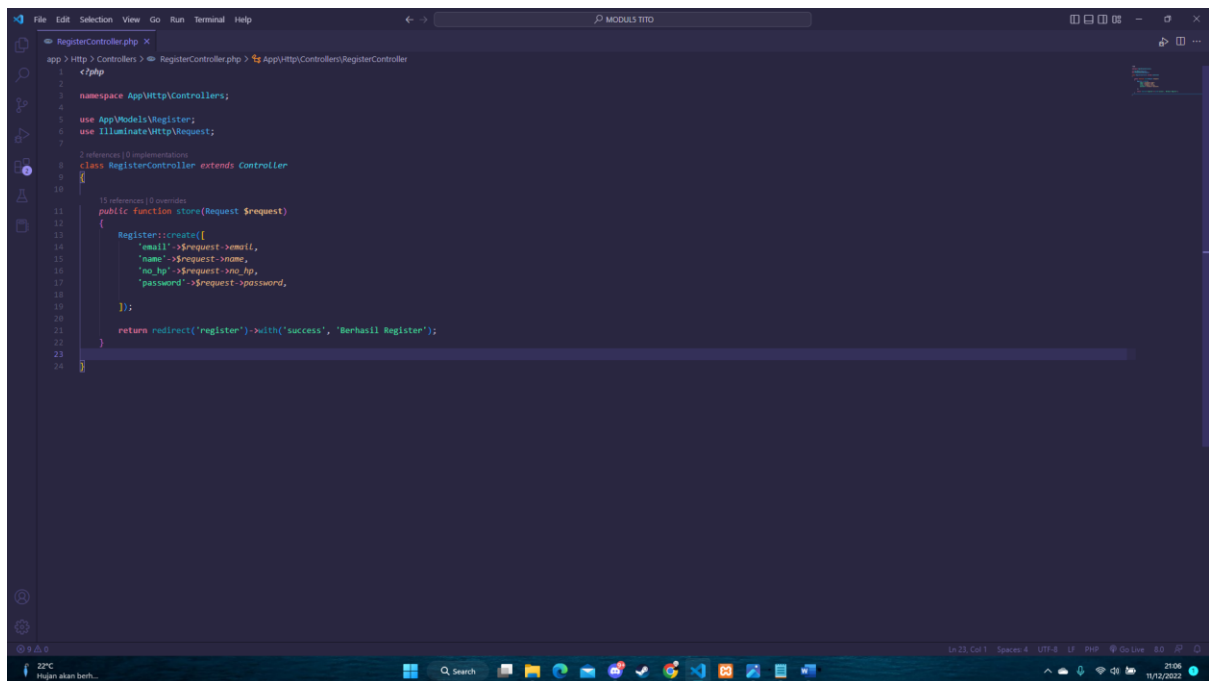

Diatas merupakan codingan tampilan register

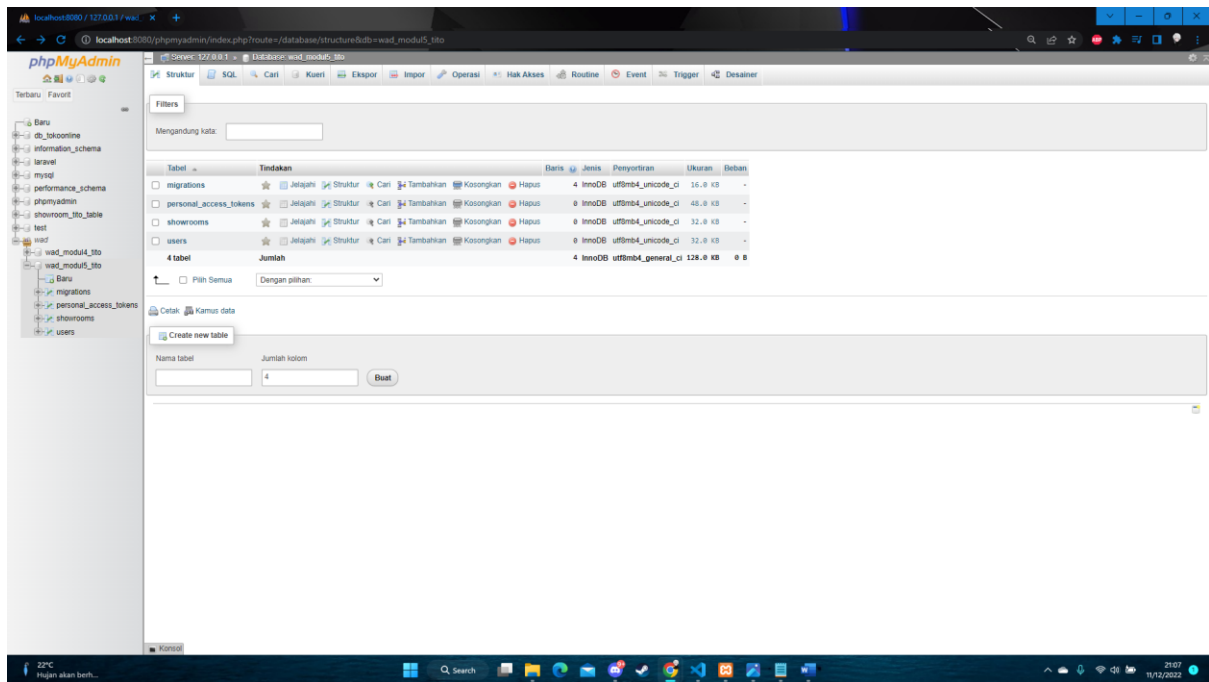

```
1 <?php
2
3 use App\Http\Controllers\RegisterController;
4 use Illuminate\Support\Facades\Route;
5
6 /*
7 |-----|
8 | web Routes
9 |-----|
10 |
11 | Here is where you can register web routes for your application. These
12 | routes are loaded by the RouteServiceProvider within a group which
13 | contains the "web" middleware group. Now create something great!
14 |
15 */
16
17 Route::get('/', function () {
18     return view('utama');
19 });
20
21 Route::get('/register', function () {
22     return view('register');
23 });
24 Route::resource('register', RegisterController::class);
25
26 Route::get('/login', function () {
27     return view('login');
28 });
29
```

Diatas merupakan codingan web.php yg berisi rute tiap page

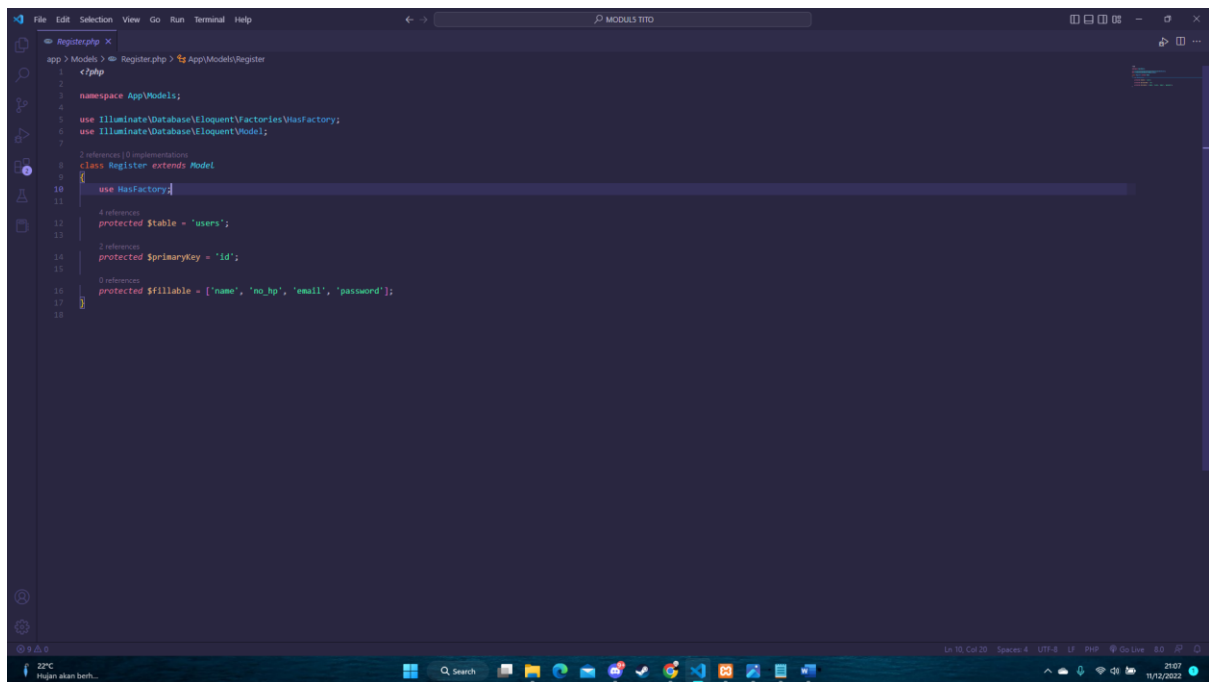

```
1 <?php
2
3 namespace App\Http\Controllers;
4
5 use App\Models\Register;
6 use Illuminate\Http\Request;
7
8 class RegisterController extends Controller
9 {
10     //
11     // references: 0 overrides
12     public function store(Request $request)
13     {
14         Register::create([
15             'email' => $request->email,
16             'name' => $request->name,
17             'no_hp' => $request->no_hp,
18             'password' => $request->password,
19         ]);
20
21         return redirect('register')->with('success', 'Berhasil Register');
22     }
23 }
24
```

Diatas merupakan codingan controller register untuk insert data form ke database

Diatas merupakan tampilan database setelah migration

Diatas merupakan codingan model register
